

MACROAREA OF ENGINEERING

SELECTION AND EVALUATION OF APPLICATIONS

PLEASE NOTE: the application has to be fulfilled online on the following website:

<http://torvergata.llpmanager.it/studenti>

The deadline for the application is specified in the general competition notice.

The student has first of all to submit his/her application which, once completed, has to be validated by the announcement's deadline, otherwise it shall be considered invalid. If an application results to be false, not compliant or incomplete it shall be considered invalid. The students can make an appointment with Mrs Rita Ricci at the Erasmus+ office if they have any doubts or need clarifications about the application before completing it.

1. Requirements and instructions for the application

Please follow the procedure described below:

- a) list all exams passed that were taken during A.A. 2016-2017 and by December 31st 2017 (download recorded exams passed during the Bachelor's Degree and the Master's Degree Courses from the website delphi.uniroma2.it and include them in the application);
- b) Students that have applied for the first year of the Bachelor Degree can submit the application; only for these students the exams passed by the end of the first semester (winter session) will be considered
- c) if exams passed do not appear on the Delphi website because they are not recorded yet, please attach a copy of the university student's record-book and add them anyway. In this case, please communicate the situation to the Erasmus office (Engineering) who will see to adding the exams to the website.
- d) attach the linguistic certification via upload.

2. Evaluation criteria for pass-list creation

Evaluated elements are listed below:

- The weighted mean score: obtained considering the number of the credits of all exams passed and recorded at Students' Secretariat within December 31st, 2017.

- Productivity: the ratio between the credits earned and the number of years passed since the year of enrolment to the Bachelor's Degree Course.

As for students who moved from other Universities, exams passed shall be considered if complete documents certifying these exams, marks and credits are submitted.

Exams passed during the Bachelor's and the Master's Degree Courses shall be evaluated together, without any distinction. Bachelor's Degree final mark shall not be evaluated. The number of full marks (30 e lode) obtained shall be considered only in the case of an equal score in the final pass-list.

All courses where the marking system is not expressed in thirtieths shall be excluded from evaluation. The final pass-list shall be divided by Degree Course. Grants shall be assigned separately by Degree Course (possible combination of similar Degree Courses shall be communicated), and choice of destination shall be made by candidates by respecting the pass-list order of each Degree Course (provided that requirements of each destination are met, both as regards language skill and level of study: PhD students, students who are preparing their graduation thesis, etc.).

As regards the following grants: École Nationale des Ponts et Chaussées, Ensta and Marsiglia (Civil Engineering), Eindhoven (Engineering Management), Lisbon, Ensta and Marsiglia (Medical Engineering), Haute École Spécialisé de Suisse Occidentale e Haute École d'Ingennerie et Gestion du Canton de Vaud (Energy Engineering and Medical Engineering), Imperial College London (Control System Engineering), final assignation is of exclusive competence of the Erasmus+ Coordinator in charge of the agreement. Grants may not be assigned if the Coordinator decides that requirements for the specific destination are not met. To this regard, students interested in the above-mentioned destinations are suggested to preliminarily refer to the Erasmus+ Coordinator in charge of the agreement.

3. Language skills required

As regards language skills required for the different destinations, the grant can expect a defined level of certified linguistic knowledge.

In fact, the program is based on agreements between the hosting and the receiving University, which, in most cases, expect a specific level of language skill (A1,A2,B1,B2,C1,C2). On the basis of the bilateral agreements, the hosting University could not accept a student that is not adequately prepared from a linguistic point of view, even after the assignment of the grant.

Therefore, the grants will be assigned with priority given to the students that already have the requested language certificate/declaration and it is attached to the application; secondly priority

will thereafter be given to the students that will obtain the certificate after the announcement closing date but before the grants' assignments. Finally and thirdly, **priority will be given** to students that still have to achieve the necessary certification. In this case, the assignment will be **subject to reserve**, that is revocable from the Erasmus+ Office if the certification required is not achieved within a deadline decided by the Erasmus+ Office.

If the student cannot produce the necessary documents of linguistic knowledge within the deadline or if the documents prove to be not adequate or false, it will lead to the loss of the assigned grant which will then be assigned to the next candidate in the ranking.

The agreement might accept linguistic skill that is declared by an Institute and not necessarily certified. Whereas, if the agreement requests certified linguistic skills the certification (mandatory) has to be released by one of the Institutes indicated below:

English language:

- TOEFL (Test of English as a Foreign Language)
- ESOL (English for Speakers of Other Languages – University of Cambridge)
- ESOL (English for Speakers of Other Languages – University of Pitman)
- IELTS (International English Language Testing System – University of Cambridge)
- ISE (Integrated Skills in English – Trinity College London)
- LCCIEB (London Chamber of Commerce & Industry Examinations Board)

French language:

- DELF (Diplôme d' études en langue française – Alliance Française)
- DALF (Diplôme approfondit de langue française – Alliance Française)

German language:

- ZD (Zertificat Deutsh – Goethe Institut/ OSD)
- ZDfB (Zertificat Deutsh fürden Beruf – Goethe Institut/ OSD)
- ZMP (Zentrale Mittelstufenprüfung – Goethe Insitut/ OSD)
- ZOP (Zentrale Oberstufenprüfung – Goethe Institut/OSD)

Spanish language:

- DELE (Diplomas de Español como Lengua Extranjera)

A self-certification from the candidate in which the student declares to be a native speaker of the language will be accepted after careful examination (it will be assigned the C2 level). The students that attend classes in English language in this Macroarea will be assigned the B2 level (English).

The stay in a foreign country, certified or self-certified, of at least 3 months for study or work purposes (for example, *Erasmus+*, *Traineeship*, *Overseas*, or other mobility projects) for students enrolled at Tor Vergata University will be accepted after examination and they will achieve the B2 level, unless they achieved more for the linguistic on line support (OLS) exam. For all the other students, it is necessary to possess an official certificate of attendance at one of the projects above mentioned.

For equivalences between the University's linguistic skills and the declaration's levels based on the QCER, refer to what is said by the Academic Centre Language (CLA):

<http://cla.uniroma2.it/idoneita-linguistica/che-cose/>.

An important innovation introduced in the Program is that Erasmus+ gives the opportunity to the attendees to develop their language skills before and during the mobility abroad. A European service of Online Language Support (OLS) was launched in 2016. This Program gives to the attendees of the mobility program the chance to evaluate their knowledge of the language they are going to use abroad, as well as to attend a free online course to develop the skills. Furthermore students interested in participating in the Erasmus+ program can attend classes eventually organized by CLA.

The linguistic knowledge level will be assigned by the Commission based entirely on the documentation attached to the application. It is highly recommended that the student attaches all the documents in his/her possession.

4. Pass-lists publication, grants assignation and signature of contracts

Final pass-lists shall be divided by Degree Course and published in the Erasmus office (Engineering) and on the website <http://torvergata.llpmanager.it>.

Students should personally check pass-list publication. No written or phone communications shall be made to students. On-line publication of pass-lists have legal value and constitute an official notice for all selected candidates.

After the pass-lists' publication, a meeting for all the Courses of the Macroarea of Engineering shall be held. In the course of the meeting, Erasmus+ grants shall be assigned by a Commission composed of the Engineering Coordinators Prof. Cinthia Campi and Prof. Fabio Del Frate, the Referral Person for the Engineering Erasmus+ Office Mrs Rita Ricci and, according to their availability, by Coordinators of the relevant Degree Courses, Referral Persons of the University Erasmus Office, of the International Relations Office and their collaborators.

Before the meeting students are kindly asked to visit the websites of each partner University they are interested in to be informed about the study offer (i.e. courses available in the relevant semester).

During the meeting students shall sign the acceptance of the grant. Students who cannot participate in the meeting can delegate a third person by providing him/her with a proxy signed by the candidate and a copy of both candidate's and delegate's identity documents.

If the student or the delegate cannot take part in the meeting, the student will be considered to be renunciative. Later, the Erasmus+ grants recipients shall be called to sign the financial agreement.

Appeals: Appeals should be signed and submitted on unstamped paper (no tax stamps are necessary). Reasons for the appeal should be clearly expressed. Appeals shall be submitted to the Engineering Erasmus+ Office – Mrs Rita Ricci – **within five days of the publication of the pass list on-line.**

Students selected for the Erasmus+ grant who, after signing the contract do not leave for the mobility period and do not timely submit their formal renunciation for serious reasons – also by attaching, if possible, confirmatory documents – shall be penalized in all future Erasmus+ grants. Their names shall be communicated to the University International Relations Office, to their Department and to Rectorship Offices for possible disciplinary measures.

Students selected for the grant shall fill in and submit the *Learning Agreement* form to the Engineering Erasmus+ Office. The Office shall then send it to the host University (partner in the Erasmus+ agreement). Submission of the Learning Agreement shall be made on time in order to respect deadlines set by the host University.

5. Disbursement of the scholarship and exams passed abroad

In order to disburse the scholarship, the student attending a full year abroad shall achieve a minimum of **24 ECTS-CFU**. In any case he/she will be able to acquire further credits until he/she reaches the maximum allowed by the study plan. The student attending a semester abroad shall achieve a minimum of **12 ECTS-CFU**. In any case he/she will be able to acquire further credits until he/she reaches the maximum allowed by the study plan. In the absence of this result, the University will not proceed with the payment of the community contribution, and will request the return of any funds disbursed in advance. The Macroarea Commission will evaluate any special cases, for instance the thesis mobility, upon written request from the applicant. The acquisition of credits is not required for the winners enrolled in the doctoral program, where the agreements expect specific scholarships for PhD students.

The University intends to adopt the principle that recognition takes place for "ECTS-CFU credits packages" according to the definition adopted by the Bologna Experts Italiani (<http://www.processodibologna.it>) that is, the package of credits acquired abroad replaces a sufficient number of credits from the educational offer of the University of Rome "Tor Vergata".

In order to set up the "package", the student must keep in mind the following indications:

- a. It is essential that the student obtains at least 2/3 of the ECTS-CFUs of the corresponding discipline at the foreign University (examples: 8 ECTS-CFU for 12 ECTS-CFU). The remaining credits must be obtained from the foreign University in disciplines considered similar to the scientific-disciplinary sector of the discipline in question, or in subjects that are relevant to the specific discipline. Additional program integrations or tests are no longer allowed on site.

In the event that this is not possible, the student who only achieves 2/3 (or more) in the corresponding discipline of the ECTS-CFU provided for in Rome Tor Vergata, but not the whole amount, will have to follow the indications that each single course (as communicated by the Delegate) establishes for the achievement of credits in disciplines similar to that indicated on the Learning Agreement in order to complete the missing credits.

In order to calculate the ECTS-CFUs, in the foreign and Italian "packages" other activities different from the exams (course attendance, laboratory, internships, language courses and all that ECTS-CFU allowed from the study courses) with any expected credits can also be included, as long as they have been agreed before departure and are indicated in the learning agreement.

- b. Within the "package" mobility it is possible to carry out bibliographic research aimed at drafting the bachelor / master degree thesis for all students who have completed the exams required by their study plan.
- c. The procedure for the recognition of exams taken abroad is carried out in the context of the degree course in which the application is received. For this purpose the following is suggested:
 - Consult the website of the host University where the scholarship was awarded;
 - Download the programs of the courses that you intend to attend and have them approved, or confirmed, through the appropriate form, by the Coordinator of your degree course, who will coordinate with the Delegated Professors;
 - The student is free to request further recognition of equivalences during the Erasmus + scholarship at the partner University, as long as the request is put to the Coordinator of the degree course, or to the Delegate Professor, by e-mail. A link should be attached of the course which requires recognition, with indication of the program, of the number of credits, and of the hours of attendance in the classroom.
- d. In order to validate the exams taken or other formative experiences carried out abroad in the Erasmus + Program, the following is noted:
 - To apply for the recognition of the study period abroad in the framework of the Erasmus+ Program, students must obtain authorisation (nullaosta) from the Erasmus+ University

office. This authorization will be issued by the said Office when the student has regularized his administrative position.

- It should be noted that, as a rule, certificates and declarations related to exams taken may require significant technical transmission time. It is therefore preferable, if the Erasmus+ coordinator of the partner University allows it, to ask for a further certification of the exams taken, or alternatively, a copy of the certification authenticated with the University's registered stamp. If the delay in the transmission of the certificates compromises the participation in a graduation session or the assignment of other scholarships or other rights, it is advisable to communicate these needs in good time to Mrs Rita Ricci who, in turn, will demonstrate these urgencies to the Offices set up at the partner Universities.
- The "packages" of the exams achieved abroad are formally submitted to the interested Degree course approval and forwarded directly to the students' Secretary of the Engineering Macroarea, that sees to the registration of the exams.

Please note: This English version of the call is made only for publicity purposes. For enforcing the call, resolving any dispute and for all legal purposes only the Italian version is valid.

**Table of Agreements and Erasmus+ grants available for the Macro Area of
Engineering
Academic Year 2018-2019**

DEGREE COURSE	PLACE	Duration in Months	Grants	Minimum language skills required according to the above-mentioned classification	Coordinator or Referral Person for the bilateral agreement
ENVIRONMENT AND TERRITORY					
Please note: The grants not assigned to Environment and Territory students can be assigned to Civil-Environmental Engineering students.					
Environment and Territory	UNIVERSITY OF APPLIED SCIENCES - TRIER www.fh.trier.de (Trier-Germany)	6	1	German: B1 declaration For attending English courses: B1 declaration	Prof Fabio Del Frate delfrate@disp.uniroma2.it
Environment and Territory	TAMPERE UNIVERSITY OF TECHNOLOGY www.tut.fi (Tampere-Finland)	10	2	Finnish: B1 declaration or English: B1 declaration	Prof Fabio Del Frate delfrate@disp.uniroma2.it
Environment and Territory	UNIVERSIDAD POLITECNICA DE VALENCIA (ETSII) www.etsitupv.es (Valencia-Spain)	5	1	Spanish: A2 declaration English (only for thesis or projects): B1 declaration	Prof Fabio Del Frate Prof Renato Baciocchi baciocchi@stc.uniroma2.it
AUTOMATION					
Please note: The grants not assigned to Automation Engineering students can be assigned to Computer Engineering students, with priority to the student of Robotics and Automation.					
Automation	LINNAEUS UNIVERSITY WWW.VXU.SE (Växjö, Sweden)	6	2	Swedish: B2 certification English: B2 certification	Prof Sergio Galeani galeani@disp.uniroma2.it
Automation	IMPERIAL COLLEGE LONDON www.ic.ac.uk Note: Exchange from IROMA02 to UK LONDON15 is limited to students from the degree in Automation Engineering and Computer Engineering	9	2	English: B2 declaration	Prof Sergio Galeani
CIVIL – CIVIL AND ENVIRONMENTAL					
Please note: The grant of Metu not assigned to Civil and Civil - Environmental Engineering students can be assigned to Building Engineering, Building Architecture and Building Techniques students. The grants for Grenoble and Cantabria Santander not assigned to Civil can be assigned to Civil-Environmental Engineering students.					
Civil	UNIVERSITÉ JOSEPH FOURIER DE SCIENCES ET DE LA TECHNOLOGIE DE GRENOBLE (France) www.ujf-grenoble.fr	10	3	French: B1 declaration For attending English courses: B2 declaration	Prof Giulia Viggiani viggiani@uniroma2.it
